SUMMARY

As a Front-End Web Developer with 2+ years of experience, I specialize in crafting visually appealing, user-friendly, and fully responsive websites. My core skills include HTML, CSS, JavaScript, React, Redux and Php along with a deep proficiency in frameworks like Bootstrap, Tailwind, and Material UI for streamlined design and development.

EXPERIENCE

SwyftCube (Sr. Executive Frontend Developer)

Dec 2023 - Present

- Designed and developed dynamic user interfaces for client projects using HTML, CSS, JavaScript, PHP, and Tailwind CSS, contributing to a 50% increase in user engagement during my job period.
- Designed and developed responsive website and landing pages.
- Collaborated with the team to implement user-friendly interfaces and improve website usability.
- Optimized website layouts for cross-browser compatibility and mobile responsiveness.
- Assisted in debugging and refining code to ensure functionality and performance.

Vertex Web Solution (Internship)

July 2023 - Sep 2023

- Skilled in creating responsive websites and custom UI components using Tailwind CSS.
- Experienced in transforming Figma and Adobe XD designs into pixel-perfect, production-ready websites.
- Optimize websites for SEO and enhance performance using Google PageSpeed Insights recommendations.

Codsoft (Remote)

Nov 2022 - Dec 2022

- Managed project timelines, helping reduce overall delivery time.
- Assigned diverse tasks to enhance team learning, productivity, and practical experience.

PROJECTS

• Author & Brand Websites

Developed multiple professional websites for authors and brands, including publishing, writing and Landing pages. Focused on clean UI, responsive layouts, and optimized performance for a smooth user experience.

• File a Company (LLC) – Custom Coded Website

Created a custom multi-step business filing website with a clean UI, optimized forms, and smooth data handling.

• Hospital Management System (MERN Stack)

Built a full-stack HMS with Admin, Doctor, and Patient roles, including profile CRUD and a dashboard showing key analytics and records management.

• Clothes Website (Wordpress)

Developed a responsive WooCommerce clothing website with customized product pages, checkout, and brand-styled UI.
